INSTRUCTIONS

READ CAREFULLY AND COMPLY FULLY

For the purpose of this determination attach hereto a neat, accurate plat, map or sketch of this lease, section, block or lot locating thereon the proposed site for this location. Plat shall be drawn to a scale which will permit the facile observation of all pertinent data. Show distances of the proposed well from the two nearest lease and section lines, and from the nearest wells on the same lease completed in or drilling to the same reservoir. If the location requested is not in conformance with the applicable well-spacing rules, show all off-setting wells to the proposed well, and the names and addresses of all adjoining lease or property owners.

In event plat is filed for the purpose of designating the drilling and producing unit, or proration unit, on which the proposed well is to be drilled, the boundaries of such unit shall be shown, also the boundaries of all other such units attributed to other wells on the same lease completed in or drilling to the same reservoir. The acreage contained within each unit shall also be shown.

Do not confuse survey lines with lease lines. The sketch or plat should show your entire lease if possible. If it is not practical to show the entire lease and the plat shows only a section, block or lot out of your lease, you should clearly show that same is only a part of the lease.

Designate scale to which plat or sketch is drawn. Also designate northerly direction on the sketch or plat.

> Re: Navajo "C" #1 Well Section 5-40N-30E Apache County, Arizona

Dear Sir:

This confirms our telephone conversation of April 25, 1960, in which you advised us that it would not be necessary for a British-American representative to attend the Commission meeting of April 27, 1960, due to the fact that the hole was plugged and abandoned. The Navajo Tribe will take over the unplugged portion of this hole to use for a water well.

You also stated then that all legal matters were ended with the dry hole.

Your cooperation has been appreciated.

Very truly yours,

THE BRITISH-AMERICAN OIL PRODUCING CO.

Mr. Gordon Strom c/o The British-American Oil Producing Company P. O. Box 180 Denver 1, Colorado

Dear Mr. Strom:

We would appreciate it if you could write us a letter stating that on April 25, 1960, you had talked to the undersigned requesting advice regarding attendance at the Commission meeting on Wednesday, April 27, 1960. You might state that I advised you that it was not necessary to attend in view of the fact that your hole was dry, abandoned, and plugged, and that the unplugged portion of said hole had been taken over by the Navajo Tribe for a water well.

You might also state that I advised you that the dry hole ended all legal matters and that your attendance at the meeting was not necessary.

We will thank you in advance for writing this letter, as one of our Commissioners felt that we should have such a letter from you in our file.

Very truly yours,

D. A. Jerome Executive Secretary

CAN CHARLEST CONTRACTOR OF THE CONTRACTOR OF THE

3/2/60 TO LE DELIVERED PERSONALLY BY A. JEROME TO: LESLIE C. HARDY, Assistant to Attorney General

February 29, 1960

Honorable Wade Church THE ATTORNEY GENERAL State of Arizona State Capitol Phoenix, Arizona

IN RE: Application of Rule No. 105 (A) and (D) Rules and Regulations - 011 &

Gas Conservation Commission.

Dear Mr. Church:

The British-American Oil Producing Company and Gulf Oil Company jointly acquired, by lease purchase, from the Navajo's oil and gas leases comprising 2,560 acres. Specifically, these leases cover all of Sections 5-6-7-8 in Twp. 40 N., R. 30 E., G. & S. R. M., Apache County, Arizona. With respect to this acreage British-American has been designated the operator.

On or about January 22, 1960, British-American staked a well location in the center of the SW-SW Section 5, 40 N., 30 E., Apache County, Arizona. This said location would strictly comply with our Rules and Regulations. (Section 105 (A) and (D) Rules). Operator's field representative reported to his company that the location as staked "falls in a ravine and an extremely rugged and rocky terrain. To prepare this location for drilling would be prohibitive cost wise; would require an excessive amount of blasting, grading, filling and levelling; and, in general, is an undesirable spot. We therefore request permission to move the location to a point 990 feet from South Line and 990 feet from West Line of Section 5, which will still be a costly location to prepare, but is much more desirable than the center of the 40 acres now staked." Several telephone conversations were had with British-American's Denver office, regarding a change of location. This is an off-pattern location, or an unorthodox location.

Due to contractual commitments for a drilling rig and road building it was imperative that a decision be reached and communicated to British-American forthwith. Our Rules permit the granting of an exception in such cases. Therefore, Mr.

#₁₀5

Commence of the second second

Honorable Wade Church February 29, 1960 Page Two

M. F. Wharton, Commission Chairman, by telegram, dated January 29, 1960, approved British-American's new location, to-wit:

"990' FSL & 990' FWL, Sec. 5, 40 N., 30 E. Apache County, Arizona"

Pursuant to Section 105 (D) of the Rules, British-American filed our Form No. P-1, with their new location thereon. Proper plats were furnished, showing the requisite information, a copy of which is attached and made a part hereof.

The crux of the situation is this: A notice of heming was not published, pursuant to the Rules, for the reason that "adjoining leesees are not affected thereby." The plat clearly shows that British-American own all surrounding and contiguous leases. Their well site is in the center of their block. If a hearing would be had, British-American would, in our opinion, be the only necessary parties. If this premise is sound, then British-American, having requested the location change, the only question to be heard at a hearing would be moot and idle ceremony. This would involve a waste of time and expense and serve no useful purpose.

The Navajo Tribe and the United States Geological Survey office, at Farmington, New Mexico, approved this new location. The Commission did not desire, at this time, to test the question of whether Arizona, under its "police powers" could require drilling operations to conform to our Rules and Regulations. There has never been, to my knowledge, an adjudication of this specific point. We feel the Navajo and the United States Geological Survey will cooperate with our Commission.

Arizona critically needs every exploratory well it can get drilled, on or off the Reservation. The Indian question has many ramifications, including the taxation of production, so we felt, under the exigency of the subject case, it was proper to grant a change of location.

Cur query now is:

Must we have a belated hearing to approve the granting of the unorthodox location, under the facts and circumstances presented hereinabove?

#105

The state of the s

Honorable Wade Church February 29, 1960 Page Three

Copies of British-American's letters and plats, together with a copy of our Rules and Regulations, are herewith enclosed, to aid you in rendering your opinion.

If we can be of assistance, kindly advise us.

Yours very truly,

D. A. Jerome, Executive Secretary

Arizona Oil & Gas Conservation Commission of the State of Arizona State Office Building - Suite 312 3500 North Central Avenue Phoenix, Arizona

Attention: Mr. Jerome

Re: Application for Permission to Drill an Unorthodox Location Navajo "C" #1 - SW SW Sec. 5-40N-30E Apache County, Arizona

Gentlemen:

In accordance with Rule 105, (a) and (d), of the Statewide Rules and Regulations of the State of Arizona, effective April 6, 1959, we herewith make application for permission to drill a well at a location closer than 560' to the nearest boundary line of the eighty (80) acre drilling unit on which the well is to be

Accompanying this application is a copy of the surveyor's plat on which is outlined the eighty (80) acre unit to be assigned to the subject well. Also included, in accordance with rules and regulations, are three copies of an area plat on which is shown all adjoining, surrounding properties. As can be noted from this plat, there are no other completed, drilling and/or permitted wells on the subject property and to the best of our knowledge and belief, there are no other such wells on any of the other adjoining properties.

Our request for permission to drill closer than 560' to a boundary line of the drilling unit is based solely upon topographical and cost reasons. The location, as originally proposed, i.e. 660' FSL and 660' FWL of Section 5, fell in a deep ravine and would have been almost impossible to drill. The now proposed location, 990' FSL and 990' FWL of Section 5, is the nearest desirable location both from a topographical standpoint and from a cost standpoint.

We shall appreciate very much receiving your formal approval of the unorthodox location at your earliest possible convenience. Form No. P-1, Intent to Drill, and \$25.00 permit fee have previously been submitted to your office. Your consideration in this matter is sincerely appreciated.

Yours very truly,

THE BRITISH-AMERICAN OIL PRODUCING COMPANY

ADDRESS ALL CORRESPONDENCE TO POST OFFICE BOX 180

January 22, 1960

Oll and Gas Conservation Commission of the State of Arizona State Office Building Phoenix, Arizona

Attention Mr. Jerome

Re: Navajo "C" #1 - Intent to Drill SW SW Section 5-40N-30E Apache County, Arizona

Gentlemen:

We have this date staked the subject exploratory location in the C SW SW Section 5-40N-30E, Apache County, Arizona.

In accordance with telephone conversation between Mr. Hairgrove of British-American and Mr. Jerome of the Arizona Commission, we enclose herewith our Sight Draft No. F-2526 in the amount of \$25.00 together with two copies of U.S.G.S. Form 9-331b, setting forth our plans for subject test.

Our field representative has reported to us that the location as staked falls in a ravine and an extremely rugged and rocky terrain. To prepare this location for drilling would be prohibitive cost wise; would require an excessive amount of blasting, grading, filling and levelling; and, in general, is an undesirable spot. We therefore request permission to move the location to a point 990 feet from South Line and 990 feet from West: Line of Section 5, which will still be a costly location to prepare, but is much more desirable than the center of the 40 acres now staked.

We will appreciate very much receiving approval to move this location as soon as possible.

As a matter of information, arrangements are being made with our General Office in Dallas, Texas, for the filing of the Organization Report and for the bonding requirements required by Commission Rules and Regulations. As soon as we receive a supply of your forms, we will submit an Intent to Drill this well on the prescribed form.

Very truly yours,

THE BRITISH-AMERICAN OIL PRODUCING COMPANY

Aubrey Hairgrove British-American Oil Co. P. O. Box 180 Denver, Colo.

Dear Mr. Hairgrove,

We are forwarding the enclosed forms to familiarize your organisation with our requirements. We ask you to complete the organisation report and form P-1 bond and return to us. All forms submitted in triplicate. On this well, we will complete form P-1 application for permit to drill and forward you a file copy.

Yours very truly,

William F. Maule, Petroleum Engineer
